May 23, 2014 you are looking at a fairly new knowledge base article with all sorts of solutions for fixing 2.0 core issues. I have the latest Accu-Sim core update v2.0. Everything runs fine. ATC says it's stable and I have no errors in the erro log. Here's something to check if all the other errors did not lead you in the right direction - the novice.bin I receive to fix some known issues in the game (not recognized string, crash because a file with that name already exists, refuel error fixed already). 07:37:50.70=fix refilled TheAxxu - Consumable Object message Displayed Wrongly. 06:19:55.42=Fix crash due to a wrong file name. Hope this helps, I've got a few more issues with the latest core and Accu-Sim, so this will definitely help.
