I have a list of ids I need to query all objects for using this list. I thought about building a query like this but it doesn't work: SELECT Id, Name, (SELECT Id, Name FROM Contacts) FROM Account But it doesn't work with select expression, I've tried forContacts as well but it won't work with my purpose. Any suggestions? A: The only way you can pull the contact details into your query is if you actually have the accountId into your variables. If you don't have the accountId into your variables and you just have the ids you can do a Map accounts = new Map([select Id, Name, (SELECT Id, Name FROM Contacts) from Account where Id in :myIds]); It won't put the contact details in, but it will put a map of the account into the account variable. You could run a map of the accounts and then query by the Id to get all contacts. Earlier this year, Rep. Alexandria Ocasio-Cortez took the stage at "the People's Climate March" in New York. "It's a movement," she told the crowd. "It's going to take a movement." "We are
