Gizmo For Windows

Gizmo for Windows is an instant international calling application that takes a simple approach to make international calls. With Gizmo, international calls are as easy as clicking on a mouse. It connects you with anyone in the world - no dialing, no waiting, no dialing again. If you have a broadband connection, you can make calls from a telephone and use voice mail on the other end. In addition, Gizmo allows you to call back your own calls at any time. Scheduling, saving, and automating your calls are also easy. Invite your family and friends to join the conversation with a single click. With Gizmo for Windows, you'll find some of the most convenient features to be international calling. The Gizmo Online Explorer lets you set up a customizable web interface to plan, schedule, and record your phone calls. You'll be able to save the calls to use for future conversations. The Gizmo Message service lets you send recorded calls to friends for when they are online or not. The Gizmo Application Manager lets you import calls, contacts, and call history from other applications and transfer them to Gizmo. Gizmo is built on a series of powerful and easy to use tools that work with calls in addition to text, voice mail, and contacts. A child lock feature prevents children from bypassing your account. You can also set up Gizmo to log all calls that you make, so that you know exactly where your money is going. Gizmo for Windows gives you more control over your Gizmo account. You can change your password, and all of your calls and credits are now stored in one convenient location.
