Description: We've been running Windows 98 for over 20 years now, and still very happy with it. You may have heard of people switching to something called "Linux" on a server, but in my view this is a very bad idea. Why? It's more trouble than it's worth, and it will make your life very much harder. Once you have installed a Linux distribution (even one as simple as Ubuntu) you will find it very difficult to get it to do anything else. That's because Linux is **not** Windows. The menus and the GUI are different, and it's very easy to make a mistake and do something which you will very much regret. For example, I remember a few years ago I did a fresh install of Ubuntu, and installed it on an HP computer which
