System Requirements:

Each of the modules in the Modulator Training Kit can be installed on the free game Modulator modpack: To install a module on the Modulator modpack, you must have the add-on currently installed, and have Steam correctly update the add-on as a compatible mod. This can be done by simply downloading and installing the mod, then selecting "Add to Modpack" from the Steam overlay. Note that the Modulator Training Kit is compatible with the Steam client version of the game. If Steam hasn't been updated to the latest version for your system yet
