ZIPSky is a file sharing service to share and download any type of files quickly in a private and secure way. The service does not require registration and it is available for free on all the most used browsers such as Internet Explorer, Firefox, Chrome, Safari and Opera. At first, ZIPSky allows you to send messages, texts, photos, videos, office documents, backup files, and much more. The service supports the

transfer of files to any device because it can upload and download any type of file from anywhere with Internet access, even files on your computer and documents stored on your phone. Through ZIPSky you can also send files to the desktop, transfer a file from your desktop to a flash drive, access files stored on flash drives, etc. You can share any type of file, such as Microsoft Word, PDF, movies, audio files, and various formats. All you need to do is to select a file, click on the “Start Sharing” button, and provide your e-mail address or phone number that will be used when you will receive a

confirmation email or text message. ZIPSky also provides a preview option so you can see exactly what you will receive. The sharing of files is done instantly as the service does not require the verification of your email account or phone number. In addition, once you have added a sharing account, you can use a large number of servers around the world, such as France, Canada, or the United States. The ZIPSky service ensures a fast transfer of files and data because it automatically selects the fastest and most reliable exchange in each area. You can also split files into smaller parts and save

money on your account. You can remove files from your computer and the account after sharing them with the ZIPSky service. ZIPSky offers the possibility to create a direct link to your shared files. You can also easily locate the shared files on your computer or on a flash drive by adding a user interface. ZIPSky is available for free on all the most used browsers such as Internet Explorer, Firefox, Chrome, Safari, and Opera. The listed file-sharing services are the best ones according to our users. We wish them good luck in their operations. Those services are categorized by their

version numbers. Usually, the older the service, the more people would use and the better it will be.
