The rest of the suite includes: Acrobat/Reader: If you work with PDF files a lot, this program is worth a look. Adobe Bridge: This program brings your photos together for you. You will probably use this in combination with Adobe Photoshop. Adobe Photoshop Elements: This is one of my favorites. It is the premiere program for beginners. Adobe Photoshop Lightroom: This program has some excellent features for organizing your photos. It works along with other programs to help you, such as Adobe Photoshop. I use Lightroom for taking photos and organizing the ones I like the best. In addition to software, you can also consider a digital camera. Digital cameras provide a set of tools that are quite similar to those found in Photoshop. But, like Photoshop, they lack some functionality that some people need for things like color correction and image-editing software. Fortunately, some basic tools work well for most digital photography situations. For example, a simple photo-editing program like Photoshop Elements can be used to eliminate wrinkles in a picture of your child that you've just snapped on the side of the street.

They amount to a 4.4% annual rise and an 8.2% increase in profits per share. The bank said in a statement that it had benefited from lower interest rates and banks paying it more to borrow. A \$2.5bn (£1.4bn) fine from US regulators over its sale of toxic mortgages is also being offset against last year's results. This happened because JP Morgan lowered its earnings projections for last year and, as a result, did not have to pay the fine. Shares of the firm rose by 2.9% on the news, lifting the FTSE 100 index by more than 50 points. JP Morgan was previously one of the most profitable banks in the United States, and the biggest US bank by total assets. In 2012 it reported a record \$10bn quarterly profit and, for the first time in its history, paid a dividend to shareholders. However, its profits have not been so generous since. However, the bank has recently been boosting its profits, with total operating expenses at JP Morgan falling below \$10bn for the first time in the company's history. JP Morgan's chief executive, Jamie Dimon, said: "We delivered top-line results in a challenging environment. We are proud of our performance, highlighted by an operating income of \$10bn, our highest ever, and record pre-tax profit of \$10.7bn." "The recent volatility in markets has not impacted our results, either from a revenue or expense perspective. We continue to invest in our business. "We have delivered strong performance across our businesses in all segments, with substantially higher credit quality in most markets, and our consumer businesses outperforming the banking industry." The bank now has a net loss of \$1.3bn in investment banking, which is more than the \$1.1bn it earned last year, and nearly three times the \$410m it made in the equivalent quarter last year.
