Is there a way in Visual Studio to jump to a specific line number or position in C code for a debug build? For instance, I want to check a stack trace and I want to jump to a specific line in the assembly that generates it. If possible, this would be preferable to editing the source code and recompiling (because I'm not sure all of my debugging notes will be kept) and would be much easier than using a line number for jumping because the line number can't change. A: Sometimes you just need to find the address of the instruction that is causing a problem and jump to it. In the x86/x64 world, this works like this: Start at the address stored in the EIP register Goto the stored instruction address Set EIP to that of the instruction you just jumped to In the
