Many images in books and magazines are the work of a graphic designer or photographer. They may need some editing if they have been poorly printed, cut apart, or faded. Photoshop has grown to be the biggest image editing program in the world, with tens of millions of users and hundreds of millions of dollars in annual sales. To be fair, another program has long been listed as a member of the Photoshop family. Adobe Flash technology has also been used as an image editor as well as for creation of animations. Adobe Illustrator is another program that can create raster images. Although it has been out of favor for a number of years, it's still the standard for graphics projects. Why? Because with Photoshop, you can do anything — including edit vector graphics (that is, drawings and objects such as text — explained in Chapter 14). If you're going to spend a lot of money buying a new graphics program, it's better

---

to spend it on Photoshop. In this book, you find out how to use Photoshop Elements to create your own images and alter and manipulate those created by others. You can also use many of the tools that come with Photoshop to make your own graphics.

\* \* \* # Mapping with Photoshop

Photoshop is good at converting raster files to vector files, which we discuss in Chapter 14. In Chapter 5, we show you how to retouch the artwork of your photographs. Chapter 16 covers how to retouch an image that you can create from scratch or insert from a stock photo. In this chapter, you find tips and tricks for working in Photoshop to retouch images.

\* \* \* ## Getting to

Know the Photoshop Interface The process of manipulating a graphic begins with the familiar workspace:

1. \*\*Choose Photoshop from the Photoshop application menu.\*\* As shown in Figure 1-1, you find an array of icons in the program window. Although it's possible to work on a new image from the Background window shown in the Figure, you can easily find where to

---

start by following these steps: 1. Click the Photoshop icon in the application menu to open Photoshop. 2. From the main menu, choose File. 3. Choose Open from the menu. 4. In the Open dialog box, navigate to your image folder and select your image. To open another image in the same folder,

Q: Getting the server and client address from a request's headers So I'm making an ajax request to retrieve a object from the server. I can get all the headers and everything, but I'm struggling to

---

get the server and client addresses. Here's a simplified code piece which I have : \$.ajax({ type: 'post', url: url, contentType: "application/json", data: JSON.stringify(obj), success: function(data, status, request){ // some other stuff here }, error: function(){ // some other stuff here } }); And when I console.log the request object I get : request: { method: "POST", url: "URL HERE", data: { "DATA1": {"VALUE1": {"Data2": "Value2"} } } I want to get the url so I can send a PUT request with that exact url. I've tried to get the Server object but it's undefined: request.getHeaders('Server') EDIT: I have to retrieve the header from inside a promise because of the use of chunking : var x = []; new Promise(function(resolve, reject) { x.push(request.getAllResponseHeaders()); resolve(x); }) I think I'll get the headers by doing this but this is not working : request.getAllResponseHeaders().forEach(function (name, value) { if (name.toLowerCase().includes('\_http\_')) && value.indexOf('300')>=0) {
