It's also just a lot more fun than Company of Heroes 2. Because of how much we've changed the way that the systems work, it doesn't have the same feeling of having to earn everything. You want to go and improve your officers' abilities, you want to go and improve your weapons, because that's how the game works. And then you can do that over and over again, and you get a lot of resources in return, and so you can keep upgrading your officers' abilities all the time. You can spend five dollars on the economy, add a new tank into your game, and then you can spend five dollars on the economy again and add a whole new tank, and then you can spend another five dollars, buy a jetpack for your jetfighters. It's an endless cycle of upgrading. It's really fun and exciting, and we think it's going to attract a lot of people that might not normally play that kind of game. I like to think of Company Of Heroes 3 as more of a strategic game, more of a RTS with more modern mechanics. We wanted to take the things that we loved about the old game - like the unit-level tactics, where you would have things like flank movements, where you could have multiple routes and multiple ways of attacking the enemy, and make sure that's all there. We had to work on things like unit control, where you can just have that sort of tactical way of approaching the battlefield, like Overwatch, League of Legends. We're taking some of the modern ones, like overwatch and League of Legends, and really bringing them into the Company Of Heroes universe.

telling me about coh 3, one of the things they're focusing on is, of course, the asymmetrical game - coh 1 and coh 2 being symmetrical - and how they're going to try to bring it back to something people haven't seen for a very long time in the genre: something like real asymmetrical warfare. coh 2 had some really great asymmetrical stuff, but it was a bit mechanical and not very much about real units, so you could almost call it'symmetrical' in terms of they both had access to the same units. but coh 3 is going to do a lot more of the asymmetrical stuff that we've seen in games like company of heroes 1 and 2. we're going to make it very clearly about real battle and how much strategy you need to win the battle - and how much of it is the battle itself, and how much of it is the support of the battle. we're going to be introducing a lot of new units to the genre, and we're going to be introducing new abilities to the genre. we want to make it much more about timing, about your ability to control your units and your ability to control the battlefield. if anything, from the comments i've seen, people are really looking forward to getting back into the game. i have to say, even as someone who didn't play company of heroes 2, i'd be interested in finding out what the game is like in a skirmish situation. but, if you've got any thoughts, leave them in the comments - and we'll take a closer look at the game next week. it's a mix of a smaller team and a bigger scope, and it's hard to say how they balance each other. in terms of scale, it's difficult to judge the team's progress as a whole, because there are so many small changes going on at once. however, littman is proud of the team's progress so far, and of the work they're putting in - there's a lot of new content planned for company of heroes 3, and the team has a lot of new features they're working on, both old and new. while a lot of the work is being done with the community in mind - their feedback, their ideas - there's plenty of internal development too, to make sure relic don't make any silly mistakes with the game. 5ec8ef588b
