While my computer is turned on, the files do not show up when I open the USB drive. However, the light on the USB drive is on. The light comes on and goes off whenever I open and close the USB drive. The problem seems to be with the USB drive, but I've tried with another one, and it gives the same thing. If I put a file on the USB drive, it works for a while, then eventually disappears. The drive is formatted and shows all the files from my hard drive. I've tried to refresh with different files, but I can't get it to work. I've tried on a different computer and different USB drive, and the result is the same. The most recent file is from December 2018. A: Ok, you have two options to get your data back. Assuming you have a mirror, you can send your data via an ethernet cable to the new server, connect the thumb drive to it, and 1cb139a0ed
