I have to set value in the constructor, which is fine. I need to set the value in ngOnInit because i don't want the view to be updated at first run, i want to let it to run its default value. This approach won't work because the constructor runs before the ngOnInit public constructor(...) { this.init(...); } public ngOnInit() { this.init(); } public init() { this.name = 'test'; } how can i set the value at first run and let the view to update later? thanks A: It's working for me. But I can't find any option to avoid run init() in constructor. public constructor(...) { this.init(...); } public ngOnInit() { // I'm just need to run init() } I need to set the value in ngOnInit so that can be easy use. However in the some cases need to run init() first in constructor. Maybe someone can find some solution. Q: Mysql query for two table question I am developing a simple survey system. It is similar to a "French Omelet" or "An English Trifle", but with additions of raisins, chocolate, and nuts in the center. The filling is a mixture of eggs, butter, milk, sugar, and flour, and the custard is typically formed around a pastry base. History The original recipe of quiche de Chantilly used onion in the center and was served at the castle of Chantilly near Paris, France. A 16th-century translation of a recipe titled "Poëson suivant l'art de Jehan de Saintré" (English: "Poison according to the art of Jehan de Saintré") was printed in 1556, and was published again in 1771. Preparation The pastry is prepared from standard shortbread dough and filled with a mixture of eggs, melted butter, sugar, and flour which is poured into a baking pan. In the center is a layer of prunes, raisins, or dried fruit (often currants) and sometimes nuts. Cream of tartar is sometimes added to prevent the formation of a crust. The pan is then covered with custard, usually cooked with a little sugar, vanilla, and almond extract. It is then placed in a 200° oven until it is set. Traditional Method Serves 12 as a side dish Ingredients For the shortbread base: 150 g (3 oz) butter (melted) 150 g (3 oz) sugar 1 egg yolk 1 teaspoon vanilla extract (preferably chilled) 300 g (10 oz) flour
