Elden Ring Game, the new fantasy RPG action game developed by Valve, is the original action RPG directed by the same creators of Half-Life 2. The Elden Ring is formed by a handful of powerful individuals who are searching for the means to revive an ancient power - 'The Grace'. The hope of finding it may be sealed by a terrible secret. At first glance, it may appear to be a venture to seek revenge against an individual who betrayed them. However, the truth is something very different, and should the party grasp at this ill-fated quest, the fate of all may be determined. Key Features: • A Vast World Overflowing with Action and Excitement A vast world where open fields with a variety of situations and huge dungeons with complex and three-dimensional designs are seamlessly connected. As you explore, the joy of discovering unknown and overwhelming threats await you, leading to a high sense of accomplishment. • Create Your Own Character In addition to customizing the appearance of your character, you can freely combine the weapons, armor, and magic that you equip. You can develop your character according to your play style, such as increasing your muscle strength to become a strong warrior, or mastering magic. • An Epic Drama Born from a Myth A multilayered story told in fragments. An epic drama in which the various thoughts of the characters intersect in the Lands Between. • Unique Online Play that Loosely Connects You to Others In addition to multiplayer, where you can directly connect with other players and travel together, the game supports a unique asynchronous online element that allows you to feel the presence of others. ABOUT VALVE Valve is an independent game development studio founded by game industry veterans Gabe Newell and Mike Harrington. Q: How to put a clickable div inside another one I want to make an ebook and i have an idea to do it. I want to be able to put one div as a page inside another one. each page has a different background image. So how can i put a link inside another div in React Native? for example: i have like this But i want to put a clickable div with a button and this div will be like another page when its clicked. A: You can use to create a kind of "div" to contain elements inside it. Take a look at the MaterialDesign-iOS-Flat example included in the android example using react-native Basically we just have a custom component that encapsulates other React components inside it. Q: Converting Keras TimeStep into tensorflow Timestep I'm using Keras to train a CNN network. I use the TimeStep class to define the number of samples as a tensor. (n\_samples, 56, 56, 1) The problem is that the TimeStep can be arbitrary - not always 28, which is the standard.

```
tf.train.Sequential model (input_shape=(x_length, x_length, 1)) model =
tf.keras.models.Sequential() model.add(tf.keras.layers.Flatten(input_shape=(28, 28, 1))) model.add(tf.keras.layers.Dense(256, activation='relu'))
model.add(tf.keras.layers.Dense(8, activation='softmax'))
```

The problem is that I cannot get the model.fit() function to work: model.fit([X\_train, Y\_train], [X\_test, Y\_test], epochs=10, batch\_size=64, verbose=1, shuffle=True, callbacks=[

The NBA's trade machine woke up just in time for the Thunder's return from their holiday break to decide to move on without Durant after he tore his Achilles. His two-time Most Valuable Player season will end with him suffering the injury that will keep him out indefinitely. But in the NBA, a player can't just up and say, "hey, I'm retiring" anymore. The league has rules to figure out what to do with a player who desires to leave a team. It's a messy situation that has dragged on for months, and the league and the teams involved found a way to work out a temporary solution. Who will end up with the player is a total mystery, but once things settle down, there will be a logical way to deal with Durant's actions. The sooner the better because the league is still
