Go to the Reviews tab for more details about the program and for more reviews. It is very important for you to download all of the big files. Although the process of working with The Aircraft Database tool is a breeze, the other big files you get as a result of the uninstallation of FlightX and FS2002 can take a time consuming while. This time it's important that you make the time to do it! And of course, this is optional, but.. we provide a version that lets you to make flight plans for free. You will have the option in the simulation menus to include or exclude your home airport when using this version.

You can also use it to train your flight skills and to fly according to your personal preference. See how to do it in the Documentation tab here! Below you will find the various sections which can be accessed directly from the main web page. These sections are further divided into different sub-sections and sub-sub sections. Take your time to read and look through these pages carefully! There are some more sections on this site as well, and some of them are available for free, which might

help you to better your experience with Prepar3d. Aircraft Database - The Aircraft Database functionality is a crucial addition to Prepar3d 2.0 and is the foundation of this release. It is closely related to the FSDSN_DIR settings on the fsdt_exe_settings.ini file. The Aircraft Database is a set of ready-to-use spits, which will include the latest version of your FSDSN. It is important to note that your FSDSN file set MUST match the fsdt_exe_settings. If your version of Prepar3d is older than 2.
