AutoCAD [Updated]

Airbrush Airbrush is used for creating soft and curved lines. The airbrush is used with pencils. The simplest way of using the airbrush is to start with a stroke, and then to press the spacebar to create the next stroke. The airbrush is more suitable for drawing curved lines on the screen.

What's New In AutoCAD?

New layer capabilities: Layers are now adjustable in size, position and rotation. This makes the ability to share or collaborate on drawings easier and more flexible. (video: 0:33 min.) Layer classification: Layers can be arranged into project groups and project folders. These groups and folders can then be stored in the project manager. Clone: The new Clone feature makes it easier to create identical drawings. You no longer have to redraw a project from scratch. New area tools: Create and edit large areas with more flexibility. You can use the new draw tools to draw geometric or graphic areas. (video: 1:10 min.) Design Review: Design review lets you see how your changes will look in real-time in your drawing window. A version of your design will appear on-screen as you work. (video: 1:34 min.) Enhanced drawing bar: The drawing bar is now bigger and better organized. You can make it easier to choose and activate commands by highlighting or activating the drawing bar at the top of the screen. (video: 1:09 min.) Enhanced preview bar: Create and edit your drawing or design quickly by using the preview bar, which has the same size as the drawing bar. (video: 0:57 min.) Improved command bar: The command bar shows commands as you move across the screen. The commands stay visible, even when you are changing your drawing. (video: 0:55 min.) Improved project manager: Projects now use floating windows, so you can keep your drawing, comments, and annotations in a central location and work on other tasks simultaneously. (video: 0:54 min.) Graphics tools: Several enhancements to the graphics tools make it easier to work with graphics and images in your drawing. (video: 0:50 min.) Improved AI enhancements: The latest AI enhancements allow you to view all the changes made by your AI assistant in real-time. This makes it easier to train and edit your AI assistant. (video: 0:55 min.) New product placement: With the new product placement, you can choose to include your product in your drawings, allowing you to easily specify the placement of your product and provide input into its placement. (video: 0:32 min.)
