## Puran Shutdown Timer Free Download For PC (2022)

This program is a shortcut for the shutdown process, which makes the computer sleep, shutdown, hibernate, log off, turn off or lock your PC. In addition, this application can also be used to launch a webpage at any scheduled time (daily, weekly, monthly, or at specified times). Startup time:2 seconds (or in 10-second intervals) Shutdown time:3 seconds (or in 10-second intervals) Sleep time:2 seconds (or in 10-second intervals) Hibernate time:5 minutes (or in 30-second intervals) Log off time:5 minutes (or in 30-second intervals) Lock time:5 minutes (or in 30-second intervals) HD idle time:15 minutes (or in 60-second intervals) CPU usage:6 hours (or in one hour intervals) Keyboard and mouse idle time:30 minutes (or in 1-minute intervals) All in all, Puran Shutdown Timer Cracked Version is an application that you can use to schedule a power management function, file or webpage launch. It comes packed with a handy set of parameters that can be seamlessly adjusted, regardless of the user's level of experience. The GUI is represented by a simple window with a clean and intuitive layout, where you can get started by selecting the task: shut down, restart, sleep, hibernate, log off or lock the computer, as well as open a file or webpage. The next stage requires you to pick the triggering event, such as countdown timer or exact time and date (or daily), a process' startup or stop, mouse, keyboard or hard disk idle time, or CPU usage drop. It is possible to create as many schedules as you want. They are automatically added to a list, from which they can be disabled or removed. Puran Shutdown Timer can be minimized to the system tray and can show a 10-second counter before an event is executed, thus giving you plenty of time to cancel it if you change your mind. The application has minimal impact on computer performance, using low CPU and RAM. It has a good response time and works smoothly. No error messages were shown in our testing, and the program did not hang or crash. All in all, Puran Shutdown Timer gets the job done. Thanks to its intuitive layout and overall simplicity, it can be configured even by users with little experience in

## Puran Shutdown Timer Incl Product Key Download [Win/Mac]

## What's New In Puran Shutdown Timer?

Puran Shutdown Timer is a power management tool that can help you improve your computer's performance and save energy. The program lets you shut down, restart, sleep, hibernate, log off or lock the computer at an exact time, or based on your computer's idle time, idle CPU usage, or mouse and keyboard activities. It can also wake you up at an exact time or by a specified event, such as a countdown timer or a time or date from a calendar. It is designed to run quietly in the system tray, so you can avoid distracting other users. The program has a clean interface with a simple layout, and you can start configuring a schedule with only a few clicks. You can create as many schedules as you want, each with its own set of options. Each time Puran Shutdown Timer starts, it shows a 10-second countdown to the triggering event, so you can cancel it easily if you wish. The application has a small impact on your computer's performance, using low CPU and RAM, and you can safely run it with an ordinary Windows installation. You can download the latest version of Puran Shutdown Timer for free from our website. The Event Scheduler is the simplest and the most powerful event scheduling utility. It has an easy to use interface and includes numerous features and options to customize your events. Features: \* The Event Scheduler can create, edit, and delete tasks based on conditions provided in them. \* You can create as many conditions as you want and use them to customize your tasks. For example, you can use a task that triggers when a file is created, another that is fired when a file is accessed, and another that triggers when a file is changed. \* You can use the tool to automatically schedule tasks, such as backup, offline-update, and creation of compressed files. \* The Event Scheduler can be used to create tasks that are based on the time, such as repeating tasks on a specific time. \* Tasks can be scheduled on a daily, weekly, monthly, or yearly basis. You can use the Event Scheduler to set up a reminder and/or automatically execute the task. \* The program supports the Windows Shell and has a clean and intuitive GUI. \* The event scheduler includes a built-in task manager. \* The application can be configured to have the task manager active at startup or after a specified interval. \* The application has a good response time and runs smoothly. No error messages were shown in our testing, and the program did not hang or crash. \* The application runs quietly in the system tray, so you can avoid disturbing other users. \* The task scheduler supports both 32-bit and 64-bit versions of Windows. \* The tool can be downloaded for free from our website. Resume dates.txt is a
