You will experience an original story, featuring a branching narrative and multiple endings. Full of inspiration from retro games such as Contra, Super Metroid and Metroid, Wayward Harbor is not only a 3D indie game, but also a great tribute to the Nintendo's legendary adventure games. However, the player's position is also different from the original. Wayward Harbor is an adventure game for the Nintendo Game Boy. At its heart, it's a Metroidvania platformer. Take over the role of Merle, an adventurer who has just returned to the streets and dungeons of Wayward Harbor. In this city, dangerous creatures are lurking in the shadows...and they're not the only ones. While Merle's not a master of gunplay, he has skills in the art of kung-fu. Armed with your trusty crossbow and your magical sword, your mission in Wayward Harbor is to find your great-great-grandfather's treasure, get up close and personal with the enemy, and rescue someone dear to your heart. Take on treacherous bosses, use the environment to your advantage, and be careful who you trust. (Steam) Support your favorite indie games on your mobile device with the Indie Game Treasure Box ($0.99). Enjoy the games you already own on the go and see what other titles you have in your library. Open the Treasure Box, find new favorites, and share them with your friends! >> More Info The lovely little city of Wayward Harbor needs your help. The mayor has vanished, and the only clues left behind are a series of mysterious symbols, a lot of missing children, and a mysterious sky pirate who seems to be after the mayor's precious treasure, which is hidden somewhere in Wayward Harbor. The mayor's home, the tavern, his contacts — you'll have to comb the town to find out what's going on. Gameplay is action-oriented, with a couple of puzzle elements, and a touch of turn-based strategy. You'll need to keep a watchful eye on the gossip around town, buy the right things from the vendors, and try to make sense of all the bits of information you're given. Even if you're not big on puzzles, it's fascinating just seeing these places in a new light. (Steam) A new two-player action game from Double Fine Productions, aimed at getting players running and jumping all over a world of double-j

Master Show VR Features Key:

Master Show VR Activation Code PC/Windows

Scoreboard Entering the Crucible is quite simple, it consists of two rooms, you have to run through them, fighting enemies along the way until you make it through the chamber. You can only do this if you have the powerful Crucible Skin in your inventory. The first room is the Ramp Room, it is quite small but has a lot of enemies, the enemies are quite weak, but if they get behind you, they can hurt you. The next room is the Vault, it is quite big and has three rooms in it, the vault has two doors, the way in and the way out. Rules The rules for this game are simple, you have 3 actions a second, if you use one of those actions, it will take a second before the action becomes available again, even if it's not your turn. This is an action system that gives you plenty of opportunities to use your powers. Synergy All the different items in the game have a synergy together, which means, that if you use one of the power actions, the other items in the inventory will have a slightly bigger effect. Power Action Name Effect Weapon Weapon Damage *Stun Time* Shield Shield Damage *Stun Time* *Cooldown* Parry Costs 1 Energy *Cooldown* Skill Costs 2 Energy *Cooldown* Impale Costs 3 Energy *Cooldown* Sway Costs 5 Energy *Cooldown* Duplicate Costs 1 Energy Costs 3 Energy *Cooldown* Devour Costs 1 Energy Costs 2 Energy *Cooldown* Shade Costs 5 Energy Costs 6 Energy *Cooldown* Every action has a different Cooldown timer, which means, that if you're not used to the game, you have to learn how to manage your actions and the cooldown. There are 2 types of skills, the first one you use 1 time, and it gives you a shield, which costs 2 energy, and it also adds 2 seconds to your Stun Time, which means, that you get to play your attack and then immediately block it with your shield. This is great for boss fights, as the longer you can stay

Fancy getting a holiday away but your budget is a bit tight? Where can you go? There are plenty of places on our planet where the air is much nicer than that of your own! Every year they are being discovered more and more often and nowhere as of lately as in beautiful Austria! Austria is the most important player in the Austrian economy and in the European industry: one of the leading countries in the European automotive and industrial world. Everything that goes on in the country is not only of interest for the economy but also for the population. One third of the population have the Austrian nationality, which is the reason why the young people there are so different from those in their neighboring countries. The Austrian capital Vienna is named after the noble family of the same name that was one of the first to settle in the area. They were the people that moved from the old Slavic region into the New World. Vienna and the surrounding area are a center of architecture and design. This is due to the many houses that were built during the Middle Ages. Most of these houses were built in the time of the Hapsburgs, who ruled Austria until 1918. This large and wealthy family played an important role in the Austrian and European history. Their next dynastic house ruled Austria for almost 250 years, until Napoleon took over and Austria became a client state of the French Empire. The last common ruler of Austria and France was the Austrian Emperor Franz Josef I. He came to the throne in 1848 and ruled Austria until 1916. Franz Josef had his summer residence in Schloss Thalerhof, which is located in the south of the city center of Graz. The Schloss Thalerhof - Graz Airport is meant to represent that beautiful house, which could rightfully be called the "Homeworld of the Hapsburg family". Thalerhof is the name of the home farm, a charming moated manor of medieval origins. The first documented reference to the name of the estate comes from the year 1220. That makes it one of the oldest structures in Graz. This development, which is the result of more than 300 years of continuous building and reconstruction, was built in the style of the old Austro-Hungarian architecture. The overall design, as well as numerous details show a mixture of architectural influences from the different periods. This combination of influences comes from the 17th and 18th century, when the city of Graz was growing and expanding rapidly. With
