In Infinity it says No Supported Trainers Available and when I use the only one listed below that, none of the options do anything. I select them, they beep to say they are on, but nothing happens. My forces still take damage, things arent made instantly and my resources arent infinite. It worked 2 days ago weirdly, but since then it hasnt worked. I have changed nothing save for installing some mods from the Workshop, like maps and skins.

Company Of Heroes is a 2007 World War II turn-based strategy video game developed by Relic Entertainment and published by THQ for Microsoft Windows. Relic Entertainment has produced two sequels and a stand-alone expansion, Company of Heroes: Opposing Fronts. CoH is set during the war on the Eastern Front of World War II. The player assumes the role of an infantry officer in the army of one of the two competing sides: the Germans or the Red Army. The game features a deep and detailed persistent tactical combat system. The game is the only World War II game with a full-fledged single-player campaign that can be played through against different AI-controlled opponents. The game was praised for its realistic portrayal of warfare and gameplay. In addition to the campaign, the game also includes an element of multiplayer gameplay in which two players may assume the roles of opposing commanders on a battlefield. CoH has had a mixed critical reception, with many reviewers remarking the game's difficulty and its effective tactics, but criticizing the fact that the single-player campaign consists of linear, repetitive missions. The game has sold more than two million copies as of August 2010. 5ec8ef588b
