Why not use other graphics editing programs? Photoshop's predecessor, Adobe PhotoShop 4, was originally designed as a professional graphics software, and it has been considered that company's flagship software ever since. However, there are now many other software programs that can do almost all of the same functions as Photoshop. The main differences between the two are that most other software programs are designed for creating images from scratch or from scanned or photographed images, whereas Photoshop is designed as a means of editing existing images. Other benefits include: \* Photoshop's ability to save the finished image in any format, whereas other programs only have specific export settings. You can get an image into a format your computer can use for other use. \* Photoshop's ability to use layers. Layers enable you to apply different effects or modify parts of an image without damaging the original. Other programs normally require you to resave an altered image as a new file if you want to save the changes. \* Photoshop's consistent way of organizing images, the use of shortcuts, and the way it allows you to revert back to a previous version. Some software programs are
